Since 2009, Saberton Denture & Implant has helped change thousands of lives for the better by committing to their mission of offering affordable, high-quality denture care, while providing the best service possible.

Saberton Denture & Implant has five locations, including one that's in downtown Hamilton at 135 James Street South, conveniently close to the Hamilton GO

Station and HSR MacNab bus terminal, an office that's located in East Hamilton at 289 Queenston Road at Parkdale Avenue as well as it's newest location at 660 Fennell Avenue East. Between Upper Wentworth and Upper Sherman on Hamilton Mountain. Founder and owner P.J. Saberton, B.Sc., M.Sc., DD has continued to expand from the three Hamilton locations, promising to provide the same level of care and service to the residents of Brantford and St. Catharines. This growth hasn't changed Saberton Denture & Implant's original goal of providing affordable denture care, with all offices now offering dental implant treatment plans, as well as payment plan options. Furthermore, Saberton Denture

& Implant's quest to provide affordability is also apparent in their denture reline and repair pricing, offering denture relines for as low as \$200 and denture repairs from \$80.

Consultations are free, and each office is staffed by fully trained and licensed denturists, all in good standing with The College of Denturists of Ontario. Saberton Denture & Implant's consultation visits are free because there are so many people who are uncertain of their status when it comes to needing teeth pulled or dentures made. By offering consultations at no charge, it helps alleviate the fear of anyone having to pay to discuss what options are available. The free consultation involves a detailed conversation

with the licensed denturist who outlines possible treatment plans, as well as all costs that may be involved. These determinations are all made before moving forward with any treatment. This process helps ensure that every Saberton Denture & Implant client is provided the care and treatment that they want.

Saberton Denture & Implant's increased role in placing dentures on implants stems from the fact the World Health Organization (WHO) recently came forward with the finding that anyone who is missing all of their teeth on one of their jaws, could be classified as disabled. The WHO also determined that the minimum treatment for anyone who is missing all of their teeth on one or both jaws is a denture secured by two dental implants.

While offering payment plans for all eligible customers, Saberton Denture & Implant will also collect directly from all insurance companies, including Ontario Disability and Ontario Works. The highly trained and experienced treatment coordinators at each Saberton Denture & Implant Centre location

handle all insurance questions at the free consultation so that the entire denture process is as stress-free as possible and every client is able to walk away confident with their new smile and bite.

For more information, please contact the Hamilton office at 905-512-0147, the East Hamilton office at 905-548-0000 or Mountain office at 905-318-2444 visit them at dentureandimplant.ca.
