

# Local Chiropractor Offers Advanced Treatment for Chronic Pain Sufferers

Dear Friend,

Have you ever wondered why 1 out of every 3 people suffer from one or more of these following conditions:

- Recurring Headaches
- Neck Pain Stiffness
- Jaw Pain (TMI)
- Numbness/Tingling or Pain in the Arms/Hands
- Chronic Muscle Spasms and Tension
- Lower Back Pain
- Spinal Disc Rupture/Pain
- Joint/Arthritic Pain
- Poor Posture

You yourself may be a victim of chronic pain and discomfort, and think that "you'll just have to learn to live with it!"

## Recurring Pain: Your Body Out of Balance

Recurring pain is a distress signal... your body telling you something is out of balance. While pain relievers may temporarily turn off the alarm switch, they don't put out the fire. In essence, they seldom correct the CAUSE of the problem and also produce dependency, dangerous side effects, and adverse reactions.

Fortunately, many types of painful conditions can now be RELIEVED and even ELIMINATED through recent advancements in chiropractic care. These new gentle, but highly effective treatment protocols are designed to correct the cause of the problem and thus, prevent it from returning.

If you've ever thought about going to a chiropractor for a painful condition you suffer from but you've hesitated because you aren't sure it is right for you, please read on...

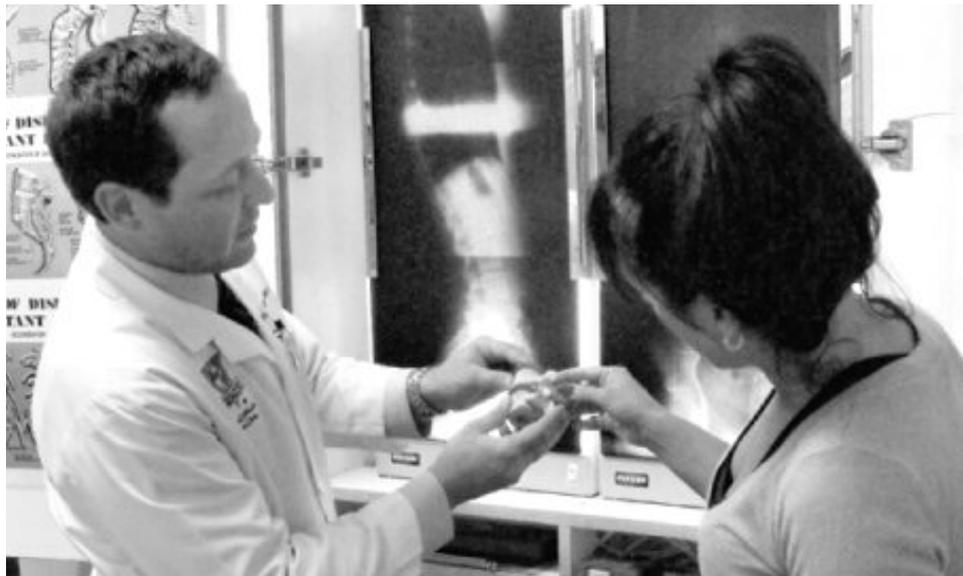

I'm **Dr. Barnes** and in light of the latest research on chronic pain conditions and new treatment methods, I have decided to hold a "Chronic Pain Clinic" to help anyone who is living in the North Hills area suffering from chronic pain and would like to discover a solution to their problem. I am holding this "Chronic Pain Clinic" as part of my ongoing community service program.

In the past, I've helped thousands of people feel better and live healthier, more productive lives following my program of "spinal-corrective" care. And now, I would like to introduce more people to the many healthful benefits my spinal care program has to offer.

So, if you've always wanted to see what advanced chiropractic care can do for you, now is the best time to do so because...

**For One Week Only,  
January 30 thru February 5, 2020**

I will hold my "Chronic Pain Clinic" and provide my comprehensive evaluation service for only \$15.00 (normally, a charge of \$150 for a new patient).

## What does this offer include?

Everything. Take a look at what you will receive...

- An in-depth consultation about your health and well being...
- A complete chiropractic spinal examination.
- A full set of specialized X-rays to determine if a misalignment in your spine is causing your pain or symptoms. (NOTE: Nobody gives these kinds of X-rays for free, they would normally cost you at least \$100).
- Helpful literature that shows how your body works and why you experience pain.
- Answers to all your most probing questions about chiropractic care and what it can do for you.

The appointment will not take long at all. And like I said, I normally charge \$200 for this (most of which just covers the full set of x-rays).

But now, as a part of this one-time offer, you can come in and find out for certain if you need chiropractic care and how it might help you eliminate pain.

## Uniquely Qualified

Before you come in, though, you will probably want to know a little bit about me. So let me tell you.

I brought professional chiropractic quality here to this area in the early 1999, besides running my successful clinic in Gibsonia, I have done extensive post graduate studies at the world renowned Gonstead Clinic in Mt. Hereb, Wisconsin, learning to successfully deal with problem cases, structural rehabilitation, extremity problems, migraine headaches, whiplash, etc.

## How we differ... from all the rest!

Here at Barnes Family Chiropractic it's our premise that unless a patient's spine is restored to it's optimum and correctly aligned position, long-term results cannot be achieved. For this reason, the

advanced treatment procedures we use allow for this necessary spinal change to occur, thus not only providing pain relief to the patient, but also providing the opportunity for long-term corrective results. This approach minimized the chance of the spinal and/or nerve problem from returning.

At the Barnes Clinic we work together, using a team approach to ensure our patients receive the best care possible.

## Does Chiropractic Really Work for Chronic Pain?

Absolutely! Here are some findings from studies done by chiropractic and medical researchers...

Chronic Low-Back Pain Treated by Chiropractor Showed Great Improvement  
"Patients with chronic low-back pain treated by chiropractors showed greater improvement and satisfaction at one month than patients treated by family physicians. Satisfaction scores were higher for chiropractic patients.

A higher proportion of chiropractic patients (56% vs13%) reported that their low-back pain was better or much better, whereas nearly one third of medical patients reported the low back pain was worse or much worse." Nyiendo et al (2000), Journal of Manipulative and Physiological Therapeutics

## Chronic Chiropractic Patients Experience Better Outcomes

"Acute and chronic chiropractic patients experienced better outcomes in pain, function disability and patient satisfaction, clinically important differences in pain and disability improvement were found for chronic patients" Haas et al (2005) Journal of Manipulative and Physiological Therapeutics

## Patient Success Stories

"I'd been suffering from severe lower back pain and hip pain for about 15 years. I suffered daily from terrible headaches. I can't tell you how long I'd gone without a goodnight's sleep. After seeing six different specialists (spinal, nerve, back), I decided to try chiropractic. After my first few weeks at the Barnes Clinic, I made noticeable progress. I haven't had one headache in two weeks. Mostly, all my pain is gone, and I am on the road to recovery. I would recommend the Barnes Clinic to anyone."

-Michelle L.

"I have suffered with many problems for over thirty years. I had headaches every day from my teenage years. I have had numerous problems with my low back, neck, and shoulders. I also have Fibromyalgia which can be very debilitating. I would wake up feeling like I was hit by a truck. After seeing Dr. Barnes I am thrilled to say I am feeling 1000% better. I travel over 30 miles each way to the clinic but it is worth it!! This has been the best experience of my life!!!"

-Sam B.

## Don't Wait... Rely on my Experience

You were unfortunate enough to be suffering from a chronic, painful condition. To add to your health problem is the fact that this may be affecting your: Job performance, personal relationship with others, recreational activities.

Don't wait... rely on my expertise to help you find a solution to your health problems. To get the answers, call my office and set up an appointment for the "Chiropractic Pain Clinic" this week. Then, just give me 1 day to analyze your tests, and on the following day, I'll tell you what needs to be done to help you with your problems.

## The number to call 724-443-2211

Call anytime between 9 am to 6pm and tell my front desk assistant when you'd like to come in for the special introductory evaluation during our "Chiropractic Pain Clinic".

We expect to get flooded with appointments for the "Chiropractic Pain Clinic" and having only 40 evaluation appointments available, I encourage you to please call me as soon as possible to assure that you don't miss this special opportunity.

I look forward to helping you get rid of your pain and discomfort so you can start living a healthier, more productive life.

Sincerely,  
Dr. William Barnes

Any further treatment shall be agreed upon, in writing,  
and signed by both parties.
