

HUGE BUYING SPREE!

**Thanks to you, Fox Valley Coins had another banner year!
We now need to restock after our huge Year-End sale!**

Even though many coin dealers, pawn shops and jewelers sell to us, our number one source for our "product" is still the collector or person that inherited a collection. We are especially wanting rare date US coins, large size currency from the early 1900's and before, \$500, \$1,000, \$5,000 and \$10,000 bills. All silver dollars and gold coins. We are very strong buyers of complete or near complete sets. As always, we buy gold, silver, platinum, palladium and Rhodium bars and coins as well as scrap jewelry and industrial.

Unlike most shops that buy gold and silver scrap from the public, we'll buy that too, but our emphasis is on the scarce coins and collector coins and currency.

Many people ask us, "Why do you only advertise that you are buying?" Simple - because most avid collectors and investors that are into bullion and numismatics already know that we are the premier coin dealership. However, if you have just inherited a collection or have lost interest in the hobby, you might not have kept up with the process. The process is easy - bring it in and we will make itemized offers on anything or everything. You sell what you want and keep what you want. It really is that easy. Did we mention that we don't charge for this verbal in-store appraisal? And we can come to you at your home, office or bank on appropriate collections. **Because we are wanting to restock now due to our huge Year-End sale, we are arranging house calls now through March.**

We say: "If you have coins and enjoy them and are avidly collecting, great. We'd love to help you fill out or upgrade your collection. But if they're just sitting in a closet or in a costly safety deposit box and you don't remember when you even looked at them...we are always buying and assure you they will find a happy home.

Did you know that Fox Valley Coins was the high buyer of over 2,800,000 old pennies from a national coin marketing company? An interesting fact: if you lay 2.8 million pennies touching side by side in a line they would be 20 miles long! By the way, that penny deal launched Fox Valley Coins to also be their number 1 supplier of old coins and currency.

Did you know that Fox Valley Coins is the leading dealer in rare coins and currency as well as precious metals in the Midwest?

In today's world of identity theft - why would anyone buy or sell gold, silver or coins through the mail? **Fox Valley Coins is CASH and CARRY.**

In the past 2 months FVC has bought and sold millions in Coins, Currency and Bullion! We need to purchase NOW to restock.
