

Planning for those sunny days: Natural Light Patio Covers from VanAm Construction

If there's one sure way to make those dreary early-Spring days less tedious, it's planning for sunny Summer days ahead.

Most of us love the sun, but we also know too much of the wrong kind of light is harmful. The ideal solution? A Natural Light Patio Cover from Van Am Construction. These versatile covers block all UV rays and 75 percent of infrared rays while letting in most of the light. Picture that perfect spot in your backyard customized into a cool, idyllic oasis filled with natural light. What could be better?

Because a Natural Light Patio Cover allows no UV rays to enter, it's impossible to get a sunburn sitting under it, and the air under the cover is cool because so much of the infrared heat is filtered out. All that's left is pure comfort while you enjoy all that summer has to offer.

Natural Light Patio Covers from Van Am Construction can be configured to work in any setting, attached to homes to cover decks or patios, or built as stand-alone covers detached from the house. They are permanent structures that stay in place year-round, so no

need for the annual tear-down exercise that goes hand-in-hand with some shelters or covers.

Natural Light Patio covers use Acrylite panels, made from 100% acrylic, guaranteed not to fade or discolor for 30 years. In addition to the 30-year warranty on the panels, there is a lifetime guarantee on the structures themselves, along with a one-year labour warranty.

Homeowners have two primary choices – aluminum or wood.

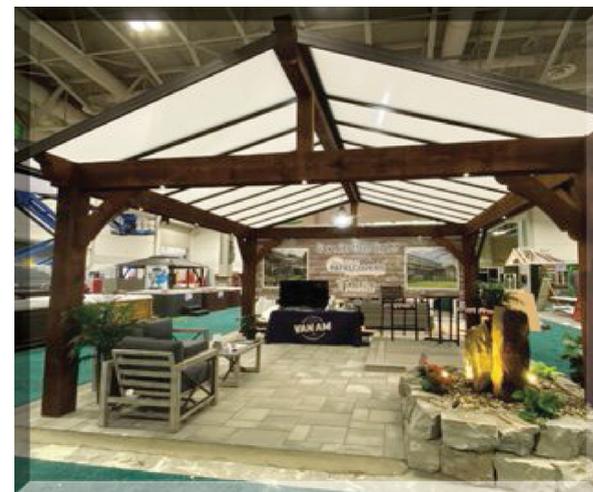

Aluminum structures come in white, sandalwood or brown. Each order is custom-made to fit perfectly with an existing deck or patio. The other option reflects Van Am's expertise as a homebuilder and renovation contractor - and the results are stunning.

"We offer homeowners the choice to have the covers built into beautiful Timberlite pergolas", says Ken Blokker, director of sales. "They're made with Douglas Fir timbers and can be stained in a variety of colours to suit any backyard décor. They're really very beautiful, and the addition of the Natural Light Patio Cover transforms the pergola into the perfect place to relax all summer long".

Van Am Construction has earned an enviable reputation across Southern Ontario for building homes and doing renovations and back yard projects of all kinds. Owner Dave Vanamerongen is based in Grimsby, while Blokker lives in London and works with customers across Southwestern Ontario.

"I've been installing Natural Light Patio Covers for many years for customers in and around London", Blokker says. "Together with Van Am, I can offer a wider selection of solutions for every backyard set-up. "Our covers offer the best of the sun without any downside", he continues. "People really can't believe it until they're standing under the cover, looking up at the blue sky but not feeling the heat of the sun on their skin. It transforms back yards".

There's plenty of time to get a Natural Light Patio Cover to enjoy this summer. Turnaround time is three weeks or less for aluminum structures, and a little longer for Timberlite Options. Call today, and make the summer all it can be.
